PROFILE

Frontend/Web Developer with knowledge of HTML5, CSS3, JavaScript, React.js, React Native, Bootstrap, and modern UI frameworks. Skilled in developing responsive and interactive web applications, creating reusable components, and optimizing website performance for enhanced user experience and efficiency. Familiar with Flutter, SQL, Supabase, API testing using Postman, and deployment platforms such as Netlify and Vercel.

WORK EXPERIENCE

Sidco, Coimbatore
Sept 2024 - Present

Signpost Celfon.in Technology

Web Developer

- Developed and enhanced responsive web applications using React.js and mobile applications using Flutter, delivering user-friendly interfaces across multiple devices and platforms.
- Built advanced search, filtering, pagination, and dynamic data management systems for directory-based platforms, improving navigation, usability, and accessibility.
- Integrated Supabase for database management, authentication, real-time data handling, and backend service integration. Worked with APIs and PHP-based backend APIs to fetch, manage, and display dynamic data efficiently across web applications.
- Managed project deployment and hosting environments using Netlify, Vercel, and cPanel, including backend integration and server-side configurations.
- Improved application performance and stability through debugging, testing, UI optimization, reusable component development, and responsive design implementation.
- Worked with SQL databases, scalable frontend architectures, and modern UI/UX practices to create efficient web and mobile solutions.

PROJECTS

ConferConnect Website

ConferConnect is a responsive conference and event management website designed to showcase and manage a digital conference experience. The platform provides users with information about upcoming events, keynote speakers, schedules, hotel accommodations, ticket pricing, sponsors, and registration details.

- Developed a responsive conference management website using HTML5, CSS3, JavaScript, and Bootstrap 5 for seamless accessibility across desktop and mobile devices.
- Designed and implemented interactive sections including speaker profiles, event schedules, pricing plans, hotel listings, sponsor showcases, and registration interfaces.
- Built a dynamic countdown timer and tab-based event scheduling system to enhance user engagement and improve navigation experience. Utilized Bootstrap responsive grid system and custom CSS styling to create modern, visually appealing, and mobile-friendly UI layouts.
- Optimized frontend structure through clean code organization, responsive design principles, and interactive web elements for smooth performance.

Tech Stack: HTML5 | CSS3 | JavaScript | Bootstrap 5

Havenly Spaces – Premium Interior Design Website

Designed and developed a modern, responsive interior design portfolio website for a luxury home décor and interior brand. The platform showcases premium design services through immersive animations, interactive media sections, horizontal scrolling galleries, dynamic content loading, and responsive UI components to enhance user engagement and brand storytelling.

- Developed a premium responsive interior design website with modern UI/UX principles using HTML5, CSS3, Bootstrap, and JavaScript.
- Implemented GSAP and ScrollTrigger animations to create smooth scroll-based interactions and engaging visual transitions.
- Designed an interactive hero section using HTML5 Canvas to enhance user experience and visual storytelling.
- Created a horizontal scrolling design showcase with immersive image galleries for portfolio presentation and enhanced interactive user engagement.
- Optimized website responsiveness for desktop, tablet, and mobile screens using Bootstrap grid system. Implemented modern UI sections including service cards, newsletter subscription, and social integration for better brand visibility.

SKILL

Technical Skills

Web Development:

- HTML, CSS, JavaScript, React.js, React Native

Mobile App Development:

- Flutter, Dart, Android Studio

Database & Backend Tools:

- SQL, Supabase, API Integration, Postman (API Testing), PHP API Data Fetching, Backend Data Handling

Version Control & Deployment

- GitHub, Netlify, Vercel, cPanel

Design Tools:

- Adobe Photoshop, CorelDRAW

Productivity & Data Management:

- Microsoft Excel, Data Entry

Softskill: Collaboration, Creativity, Communication

Language: Tamil & English

EDUCATION

2021-2023

MCA - Computer Application

Dr. SNS Rajalakshmi college of arts and science

CERTIFICATIONS

- Attended [National level Quiz by HICAS HTML/CSS and C
- course by Sololearn Java
- Python Bootcamp by Letsupgrade
